- MOBILE-PLAN basic: Data provisioning
- Central interfaces to existing backend systems
- Communication via GPRS

Christchurch is the largest city in the South Island of New Zealand, and the country's second-largest urban area. It lies in Canterbury, near the centre of the east coast of the South Island, east of the Canterbury Plains. The city has one of the highest-quality water supplies in the world, rated one of the purest and cleanest water in the world. The area administered by the Christchurch City Council has a population of 368,900 (June 2008 estimate).

The agricultural industry has always been the economic core of Christchurch. In the last few decades, technology-based industries have sprung up in Christchurch but also tourism is a significant factor of the local economy.

INIT Products and Systems

- EVENDpc
- TOUCHbill
- MOBILEvario
- MOBILE-PLAN basic
